I, _____, authorize The Barber Shop to perform all services agreed upon for my vehicle/V.I.N.: _____. My signature confirms that I am the person, or an agent acting on behalf of the person, obligated to pay for the services performed, and I agree to these terms and conditions. I understand that if closer analysis finds that additional labor and/or materials are required to complete the services outlined, I will be contacted for authorization directly if such changes require an adjustment in price and/or completion date.

Paint Correction & Ceramic Coating Service Guidelines: Paint correction and ceramic coating application are delicate processes, and this document serves to outline expectations for your service and as a reference for proper aftercare.

Curing Period: Allow at least 1 week for the ceramic coating to fully cure. During this period, avoid washing your vehicle or exposing it to harsh weather conditions. Refrain from using pressure washers, automatic car washes, or abrasive materials to ensure the coating bonds properly.

Guarantee: Ceramic coatings come with a guarantee of up to 5 years (or the duration agreed upon) against the hydrophobic properties failing. This excludes damage caused by improper care, neglect, or intentional abuse, and does not cover normal wear and tear.

Pre-Existing Paint Conditions: While paint correction significantly improves the appearance of your vehicle's finish, it may not remove all imperfections such as deep scratches, rock chips, or severe blemishes. Ceramic coatings will enhance the existing paintwork but will not conceal any defects left after the correction process.

Paint Correction Limitations: Paint correction removes minor scratches, swirl marks, and imperfections through careful machine polishing. In some cases, achieving 100% correction may not be possible depending on the condition and thickness of the paint.

Coating Application: Ceramic coating application is a precise process, but dust, debris, or environmental factors may result in minor imperfections. These are rare but are considered normal within industry standards and do not affect the long-term durability or performance of the coating.

Aftercare: Do not wash the vehicle for at least one week after the ceramic coating is applied. When washing, use only pH-neutral soaps, soft, non-abrasive materials, and avoid high-pressure washing to protect the coating's integrity. For optimal coating performance - we recommend a quarterly maintenance detail with The Barber Shop.

Damage Exclusions: The guarantee does not cover damage caused by impact, contact with abrasive surfaces, or improper washing techniques. Damage caused by exposure to bird droppings, tree sap, or other environmental contaminants is also excluded

.

Spot Imperfections: In rare cases, high spots or streaks may be visible after the coating cures. These will typically even out after the full curing period. If they persist, please contact us for adjustments within two weeks of service completion.

Refund Policy: No refunds will be issued after the ceramic coating and paint correction services have been completed. In rare cases, reapplication may be considered if application errors are identified and fall outside industry standards.

Photo Release: By signing this form, you authorize The Barber Shop to use photos or videos of your vehicle for promotional purposes, including social media and advertisements, unless otherwise discussed.

The Barber Shop is committed to client satisfaction and quality service. By signing this waiver, you acknowledge and understand the realistic expectations of paint correction and ceramic coating, including the maintenance required to preserve the service's quality and longevity.
